Re:

Request for Rescission of Permit Surrender Title V – DEC ID No. 8-5736-00004/00013 Title IV – DEC ID No. 8-5736-00004/00014 Greenidge Station, Town of Dresden, Yates County

Orecinage Station, Town of Dresden, Tates

Dear Mr. Pierce:

This replies to your January 24, 2013 letter to the Department, sent to my attention, requesting that the Department rescind the surrender of the above-referenced Title IV and Title V permits.

Please be advised that there is no provision in the Department's laws or regulations to rescind the surrender of the above-referenced permits. The AES Greenidge Title IV and Title V permits for the Greenidge Station facility were duly surrendered by AES Greenidge, LLC and, upon acceptance by the Department in its December 19, 2012 letter (which you attached to your letter), became null and void. Further, based on the documentation available to the Department, the facility has been sold by AES Greenidge, LLC to a new owner, GMMM Greenidge, LLC, which you represent. If any entity wishes to operate the air emissions sources at the Greenidge Station facility, they will need to file new Title IV and Title V permit applications with the Department.

Thank you for your consideration.

Two E. Sheeley

Sincerely,

Scott E. Sheeley

Regional Permit Administrator

Re: Permit Reinstatement

Title V- DEC ID 8-5736-00004/00013
Title IV- DEC ID 8-5736-00004/00014
AES Eastern Energy, LP – AES Greenidge, LLC to GMMM Greenidge, LLC
Town of Torrey, Yates County

Dear Mr. Sheeley:

As you may recall, this Firm represents GMMM Greenidge, LLC in connection with its acquisition of the Greenidge power generating facility in the Town of Torrey, Yates County, New York from AES Greenidge, LLC. The approval of the transfer of the SPEDS Permit for Greenidge Station, SPDES Permit #NY-0001325, from AES Greenidge, LLC to GMMM Greenidge, LLC was previously approved by the Department as evidenced by your letter of January 15, 2013 to the undersigned.

In connection with this transfer, it was contemplated that the Greenidge facility was being purchased for scrap and salvage only; there was no thought of reopening that facility for operation. Accordingly, AES Greenidge, LLC submitted correspondence dated November 28, 2012 surrendering, or relinquishing, the following air permits:

- 1) Title V-DEC ID 8-5736-00004/00013; and
- 2) Title IV –DEC ID 8-5736-00004/00014.

The Department accepted the surrender of these permits by letter dated December 19, 2012 addressed to Peter Norgeot, President of AES Greenidge, LLC. A copy of this letter is enclosed for your reference.

Subsequent to the acquisition of the Greenidge facility by GMMM Greenidge, LLC, we have discovered that there is substantial interest in reopening that facility to generate power using a combination of coal and other supplemental fuel sources. My client has engaged in numerous discussions with DEC personnel regarding this possibility and everyone involved, including local officials, is supportive of this proposal as it would retain much needed job opportunities in, and provide tax revenue for, the local area.

As a result, we are requesting that the Department rescind the surrender/termination of the Title IV and Title V Air Permits listed above and approve the transfer of those permits to GMMM Greenidge, LLC. This will give GMMM Greenidge LLC a meaningful opportunity to attempt to return this facility to productive use.

Please advise if the Department requires any further information, including, but not limited to a formal Permit Transfer Application, and I will do my best to provide that information to you. Should you have any questions regarding this matter, please do not hesitate to contact me.

Very truly yours,

LINDABURY, Mc@ORMICK, ESTABROOK & COOPER, P.C

AES Eastern Energy LP - AES Greenidge LLC

Town of Torrey, Yates County

Dear Mr. Norgeot:

The New York State Department of Environmental Conservation (DEC) has received your letter dated November 28, 2012 regarding the permanent shutdown and pending demolition of the AES Greenidge Station in the Town of Torrey, Yates County.

Your submission has satisfied the requirements listed in 6 NYCRR Part 621 [Section 621.11(d)] for permit relinquishments. Therefore, in accordance with 6 NYCRR Section 621.11(e), this letter constitutes written verification of the Department's concurrence with relinquishment of the above-referenced permits. We have also withdrawn the active application to renew and modify the Title V and Title IV Permits received May 4, 2012, and have discontinued the previously SAPA-extended Title IV and Title V Permits.

The Title IV and Title V Permits referenced above are no longer in effect.

Please contact me at this office at (585) 226-5382 if you have any questions regarding this letter.

Sincerely,

Jeotte E. Sheeley

Subject: Greenidge

Hi Dave-

To follow-up on our call, we talked to our staff and they mentioned we would like to see the following documents which Greenidge refers to in the April 1, 2014 letter:

- 1. The attachments to the March 14, 2013 letter submitted to NYSDEC
- 2. A copy of the April 2014 Title V operating permit application submitted to NYSDEC
- 3. A copy of the Title V air permit and permit review report of the facility which was in effect before stopping operation-

We would appreciate it if you can ask your staff to send the documents our way. Thanks, Rick

Subject: Information/Clarifications-Greenidge Generation Station

Hi Dan:

Here are some additional information/clarifications related to Greenidge, which we have at this time.

Thanks, Viorica

- 1. Could you please send us the draft permit you have prepared, so far, for Greenidge?
- 2. Were there any state regulations (e.g., RACT, etc)-before Greenidge had terminated their permits-applicable to NOx and CO, or VOC emissions resulting from the combustion sources such as the Greenidge's Unit 4-coal fired boiler?
- 3. Are there, currently, any state regulations that would be applicable to the NOx, CO, or VOC emissions resulting from combustion sources such as the Greenidge's Unit 4–coal fired boiler?
- 4. Do you have information regarding the annual emissions used for the air quality analysis purposes? If not, who should we contact to get this information?
- 5. Do you have actual data from the stack tests performed after installation of the control equipment?
- 6. Do you kow if Greenidge was required to monitor the type and amount of fuel combusted, MW, MMBTU, and/or hours of operation?
- 7. Do you know if Greenidge has reported (as part of the Emission Statements) the actual type and amount MW, MMBTU, and /or hours of operation?
- 8. Actual Date-when the U4's control equipment became fully operational From Appendix A-History of Greenidge- it seems that Unit 4 has only became using the new control equipment and became fully operational on December 18, 2007. Additionally, from the Fee Billing Tonnage Summary, it seems that in 2007, the facility's emissions, were still high (which may indicate that the SCR/SNCR, baghouse, and other controls were not fully operational). Would it be possible for you to verify/confirm whether December 18, 2007 is indeed the date when Greenidge started using all their newly installed control equipment?

Hi Dan:

Here are some additional information/clarifications related to Greenidge, which we have at this time.

Thanks, Viorica

1. Could you please send us the draft permit you have prepared, so far, for Greenidge?

See the attached PDF file: greenidgeworkingcopy140702

- 2. Were there any state regulations (e.g., RACT, etc)-before Greenidge had terminated their permits-applicable to NOx and CO, or VOC emissions resulting from the combustion sources such as the Greenidge's Unit 4-coal fired boiler?
- 6 NYCRR Part 227-2 was effective at least as far back as the end of 2004. It was amended in 2010 with new RACT limits effective 7/1/14.
- 3. Are there, currently, any state regulations that would be applicable to the NOx, CO, or VOC emissions resulting from combustion sources such as the Greenidge's Unit 4–coal fired boiler?

See previous answer

4. Do you have information regarding the annual emissions used for the air quality analysis purposes? If not, who should we contact to get this information?

You should contact Ona Papageorgiou in Albany. I believe you have her contact information from my previous message.

5. Do you have actual data from the stack tests performed after installation of the control equipment? See the attached files: greenidgestacktestrept080212

greenidgempcreport071017 greenidgempcreport071121

- 6. Do you kow if Greenidge was required to monitor the type and amount of fuel combusted, MW, MMBTU, and/or hours of operation?
- I believe they did, but we wouldn't see that data routinely reported in this office. Ona Papageorgiou in Albany may have that information.
- 7. Do you know if Greenidge has reported (as part of the Emission Statements) the actual type and amount MW, MMBTU, and /or hours of operation?

Same as previous answer

8. Actual Date-when the U4's control equipment became fully operational From Appendix A-History of Greenidge- it seems that Unit 4 has only became using the new control equipment and became fully operational on December 18, 2007. Additionally, from the Fee Billing Tonnage Summary, it seems that in 2007, the facility's emissions, were still high (which may indicate that the SCR/SNCR, baghouse, and other controls were not fully operational). Would it be possible for you to verify/confirm whether December 18, 2007 is indeed the date when Greenidge started using all their newly installed control equipment?

Since this happened before I was involved with this facility, I don't know the actual startup date. However the attached greenidgempcreport071017 document indicates the equipment was started in November, 2006.

Hi Dan:

The maintenance activities listed in Attachment 4 are mentioned by Atlas in its letters to DEC dated April 1, 2014 and May 16, 2014 as the activities that have been completed at Greenidge during the shutdown. Do you have any documents that would show the date when each activity was performed and by whom (AEE2, GMMM or Atlas)? If not such documents exist do you think it would be possible for you to obtain them?

Thank you, Viorica

Viorica Petriman Environmental Engineer US EPA –Region 2 Air Permitting Section 212-637-4021

Attached

<u>Greenidge Generating Station</u> Maintenance Activities Performed

The following list highlights many of the activities performed at the Greenidge Generating Station ("Greenidge" or the "Facility") following the period in which the Facility was put into protective lay-up that began in March 2011. These activities would typically only be conducted in a plant that was intended to operate in the future.

• Fixes

- o Repaired sump pumps, waste pumps and fire pumps
- o Repaired waste water treatment facility
- Repaired emergency generators
- Repaired landscaping ditches
- o Repaired boiler roof
- o Repaired the compressed air system
- Repaired office heater multiple times
- o Repaired Potable Water System piping
- Repaired and Maintained the Lockwood Landfill Cover System from erosion and deep rooted vegetation

• Maintenance

- o Maintained transformers (station service transformers and generator step-up transformers) and all associated switch gear.
 - Nitrogen (inert gas) blanket on transformers
- o Maintained all high voltage motors
 - Wrapped and Dehumidified with electric lights
- Maintained backup battery systems
- Maintained the Distributed Control System
- Maintained inert gas blanket on generator
- Maintained locomotive and rail road spur
- o Maintained bulldozer for coal handling and biomass handling machinery
- o Maintained and operated the house service water system
- o Maintained and operated the station compressed air system
- o Maintained and operated the potable water System

• Other:

- Cleaning and general janitorial and landscaping
- Performed ongoing treatment of waste water runoff from the coal pile so that it could continue to be maintained (instead of remediating the coal pile)
- o Did not electrically isolated any of the equipment (i.e., have kept everything ready to run)
- Maintained and supervised 24hr security
- o Coordinated construction activities with NYSEG to prevent any interference with the future reactivation of the generating capabilities of the facility

Subject: RE: Activities Completed during the shutdown of Greenidge

I just wanted to let you know that I passed your questions on to the applicant. We forwarded the July 31 letter from Riva to Marriott to them for their input. They are preparing a response to the letter so I expect these questions will be included in their reply. I don't know when they will reply, but they understand we can't move forward until they do.

If you haven't already noticed, our email address changed on July 14. The new address is as follows:

Daniel E. Walsh, PE Environmental Engineer 2 Division of Air Resources New York State Department Of Environmental Conservation Region 8 Headquarters 6274 East Avon-Lima Rd. Avon, NY 14414

Phone: <u>585-226-5317</u>
Fax: <u>585-226-2909</u>
<u>dane.walsh@dec.ny.gov</u>

Subject: Activities Completed during the shutdown of Greenidge

Hi Dan:

The maintenance activities listed in Attachment 4 are mentioned by Atlas in its letters to DEC dated April 1, 2014 and May 16, 2014 as the activities that have been completed at Greenidge during the shutdown. Do you have any documents that would show the date when each activity was performed and by whom (AEE2, GMMM or Atlas)? If not such documents exist do you think it would be possible for you to obtain them?

Thank you, Viorica

Hi Dan,

I think a kick off telephone call would be a great idea between the technical personnel. This will allow us to get a feeling for what information Viorica is looking for. If you could set up a call for anytime on Wednesday that would great. The only other person from Greenidge that I would like to participate is Dave from ERM to help us answer any of the technical permitting issues that may arise in the future.

Thanks again for everything, Dale

This is the air permitting engineer at EPA Region 2 that has been asked to review your Title V application. I shared a lot of correspondence with her including the MS Project restart work schedule you sent me. I think that is what these questions are about. I'm thinking it would be better if you respond directly. There are likely to be a lot more questions that will need your input as we go forward. If you do begin a direct conversation with EPA I would only ask that you CC: us at DEC on any correspondence. If a telephone call happens at some point we would like to at least listen in. If you are not comfortable with this idea, I don't have a problem acting as go-between. I just thought it would be more efficient if you give EPA the information they want directly.
